Work Experience

Given London: Creative Producer Intern

London, UK | *August 14th 2018 – Present*

- Working collaboratively as a team of 5 interns to create a social impact campaign in the form of a short film for O2's Go Think Big project and providing structured, organised materials for the brand agencies side of the project.
- Reviewed in-depth research from online resources and interviews with experts; then turned it into useful insights to present to my team which could be utilised for the creative brief, plus the agencies side of the project.
- Using my project management and creative thinking skills we created a manifesto, mood boards, anchor words, reference materials to map out the film's storyboard and camera shots, whilst the following O2's guidelines, budget and timings.

Kodama Ltd: Web Design Intern

Remote, UK | *July 23rd 2018 – Present*

- Redesigning/rebranding website for their new VR product soon to be released; which consisted of researching similar products currently on market, creating wireframes for the website, and developing the website.
- I worked closely with the Founder to gain feedback on designs and advise on assets to be created.
- Gained thorough understanding in web development, UX design and prototyping VR games using a range of technology including Unity, Axure, WordPress, PHP, HTML&CSS, and JavaScript.

Funtech: Tech Tutor for Daytime Camps

St Albans, UK | *July 10th 2017 – August 26th 2017*

- Worked with a minimum of 8 students at a time in a fast-paced dynamic environment, where often students had learning requirements and I ensured they left with positive experiences by adapting content to individual needs of each student.
- Increased the percentage of positive reviews left on the website to 97% by providing a fun, supportive environment
- Reinforced course content by incorporating extra exercises for students of varying abilities and proposed these exercises to head office to consider – for example in 3D Game Design I added more blueprint exercises for consolidation.

Octopus Labs: Web Developer Work Experience

London, UK | *June 26th 2017 – July 7th 2017*

- Planned with a Senior Developer on the best solution to develop my python application given the time frame and my current skills, thus receiving advice on how to use MySQL with Python and deploying apps on the Google Cloud platform.
- Discussed with CTO on each stage of my application to ensure that it fit the requirements and received feedback on improvements that could be made.
- Created a web application that would make it easier employees to search up the number of cheques they have received rather than ask the reception every time, which involved the use of API's to retrieve the information from.

Projects and Leadership

Queen Mary University: Group Projects

London, UK | *January – March 2018*

- Project Leader: Created web application that reduces company's food waste by using Laravel Framework, Bootstrap, Stripe API and MySQL database. Guided team members on how to use the Laravel Framework.
- Lead developer: Weather App application made in React for people who do water sports. Integrated the search function and calling 2 API's with the same call method; then extracted required information from it.

Code First: Girls: Advanced Course for Ruby

London, UK | *September – November 2016*

- Demonstrated my skills in leading a team to make a website using Ruby on Rails, MYSQL and HTML/CSS for 4 weeks. I covered a mixture of roles from Project Manager, Software developer and UX Designer.
- Improved my website by asking for tutors for feedback and they taught me how to use GitHub, Sinatra and Heroku to make forms, databases, and web-based applications.

Education (Graduating 2019)

Queen Mary University: BSc Computer Science

London, UK | *September 2016 – Present*

First Year – 1st, Second Year – 2:1

Udacity: Android Basics Course – Google Developer Scholarship - Passed

Online Course | *November 2017 – July 2018*

Course Outline: User Interface, User Input, Multi-Screen Apps, Networking (API) and Data Storage (NoSQL)

Technical Skills

Programming languages: Intermediate – Java, Python, Ruby, PHP, JavaScript | Advanced – HTML&CSS | Basic – C#

Applications: WordPress, Blender, Axure, Android SDK, Laravel, Flask, Ruby on Rails, React, Affinity Designer, Marvel

Database Systems: MySQL, SQLPlus

Interests & Achievements

- **Hackathons and Technology Events:** Stemettes Food Coding weekend, Intuit Small Business Hackathon, Bloomberg Masterclass(SEO), J.P. Morgan – Code for Good, #AcornHackADA held by Acorn Aspiration, Ada College and Google
- **Volunteering:** Code Club (2017), National Citizen Service (2014), Code First: Girls Instructor (2018), Art Night 2018
- **Societies:** BCS (2015-present), Electronic Engineering and Computer Science(2015-present), Korean Society (2016-present)
- **Hobbies:** I have a passion for art and I regularly go to museums; in the past 2 years I have been to 40+ exhibitions.
- **Portfolio:** <http://winsomeyuen.com/>
